### ✓ **ACER starts data collection and market monitoring of wholesale energy markets**

- Reporting of market data to ACER started on 7 October. More than 1 million records of transactions, including orders to trade, reported to the Agency per day from 33 (out of 37) third party Registered Reporting Mechanisms for 1,476 market participants.
- Records of transactions in wholesale energy contracts, including orders to trade, at Organised Market Places and fundamental data from the ENTSOs' central information transparency platforms must be reported.
- From 7 April 2016, remaining wholesale energy OTC contracts and reportable fundamental data from TSOs, LNG System Operators and Storage System Operators will have to be reported.
- ACER is responsible for monitoring markets and reporting potential breaches to the relevant NRAs, who are responsible for investigations and (in some cases) imposing sanctions.

## ✓ **ACER and CEER submitted and published joint response to the European Commission's consultation on a new energy market design**

- The joint response builds on the proposals included in the "Energy Regulation: a Bridge to 2025" Conclusion Paper of September 2014
- Our proposals should be read in the context of the current ongoing implementation of the Third Energy Package, including Guidelines and Network Codes, as well as of REMIT
- We put a number of suggestions to the European Commission for consideration in future legislative proposals
