

## ACER Webinar on the results of the methodological study on barriers to competitive electricity markets

Thursday, 20 May 2021, 09.00 - 10.30 CET

DRAFT AGENDA		
08.45 - 09.00	Dial-in time	Starts promptly at 09.00
09.00 - 09.10	Opening	Cristina VAZQUEZ HERNANDEZ, Policy Officer – Electricity Department, ACER
09.10 – 10.00	Presentation: Results of the study on barriers to competitive electricity markets <ul style="list-style-type: none"> <li>▪ Main barriers to efficient price formation and easy market entry and participation for new entrants and small actors: Bart STOFFER, DNV</li> <li>▪ Indicators developed to measure the barriers: Jørgen BJØRNDALEN, DNV</li> <li>▪ Methodological approach in building the composite indicators: Malte NUßBERGER, DNV</li> </ul>	
10.00 – 10.25	Q&A (online submissions via chatbox)	<b>Moderator:</b> Thomas QUERRIOUX, Policy Officer – Electricity Department, ACER
10.25 - 10.30	Closing	Cristina VAZQUEZ HERNANDEZ, Policy Officer – Electricity Department, ACER

**Workshop objective:** A methodological study has been carried out, with the support of a consultant (DNV), to identify and measure the barriers to the development of competitive electricity prices and the entry and participation of new market players in the EU electricity wholesale markets. This study has benefited from inputs collected from a wide range of stakeholders through a public consultation and some interviews.

The aim of this study is to assist ACER to fulfil effectively its new monitoring responsibilities set in the Clean Energy Package. In particular, the study has defined some indicators to be progressively included in future editions of ACER's Annual Report on the Results of Monitoring the Internal Electricity and Natural Gas Markets (the so called “Market Monitoring Report”).

In this webinar, stakeholders will get information about the barriers identified, the indicators to measure them and the methodology to combine these indicators.

ACER will host this webinar on the Webex platform.
