

Network Code Balancing

Overview for 19th CSE IG Meeting

March 13th, 2013

Disclaimer:

Presentation based on DRAFT Version of the NC Balancing!
NC Balancing is work in progress.

Reliable Sustainable Connected

What happened so far...

- Scoping phase of DT started in June 2012
 - After final FG EB were available (18.09.) drafting of NCEB started.
 - First draft (half) was available beginning of December 2012 (first concepts for discussion with EBSAG)
 - Official start of NCEB development 01.01.2013 (letter EC)
 - First “complete” draft was available middle of February 2012.
- Strong links to other NC Drafting Teams and WG AS are established.
- Open and direct communication with stakeholders was/ and still is a guiding principle!

Drafting Team

- DT consists of 16 people.
- Also, there is an excellent geographical representation in order to consider different practical experience.
- Full support of DT members needed and confirmed by members (it is ensured that 50% of their time is reserved for DT purposes)!
- As almost no blue prints are available (compared to e.g. operational security, CACM, etc.) drafting the NC was/is very challenging.

→ Stakeholder involvement is very important!

Stakeholder involvement so far

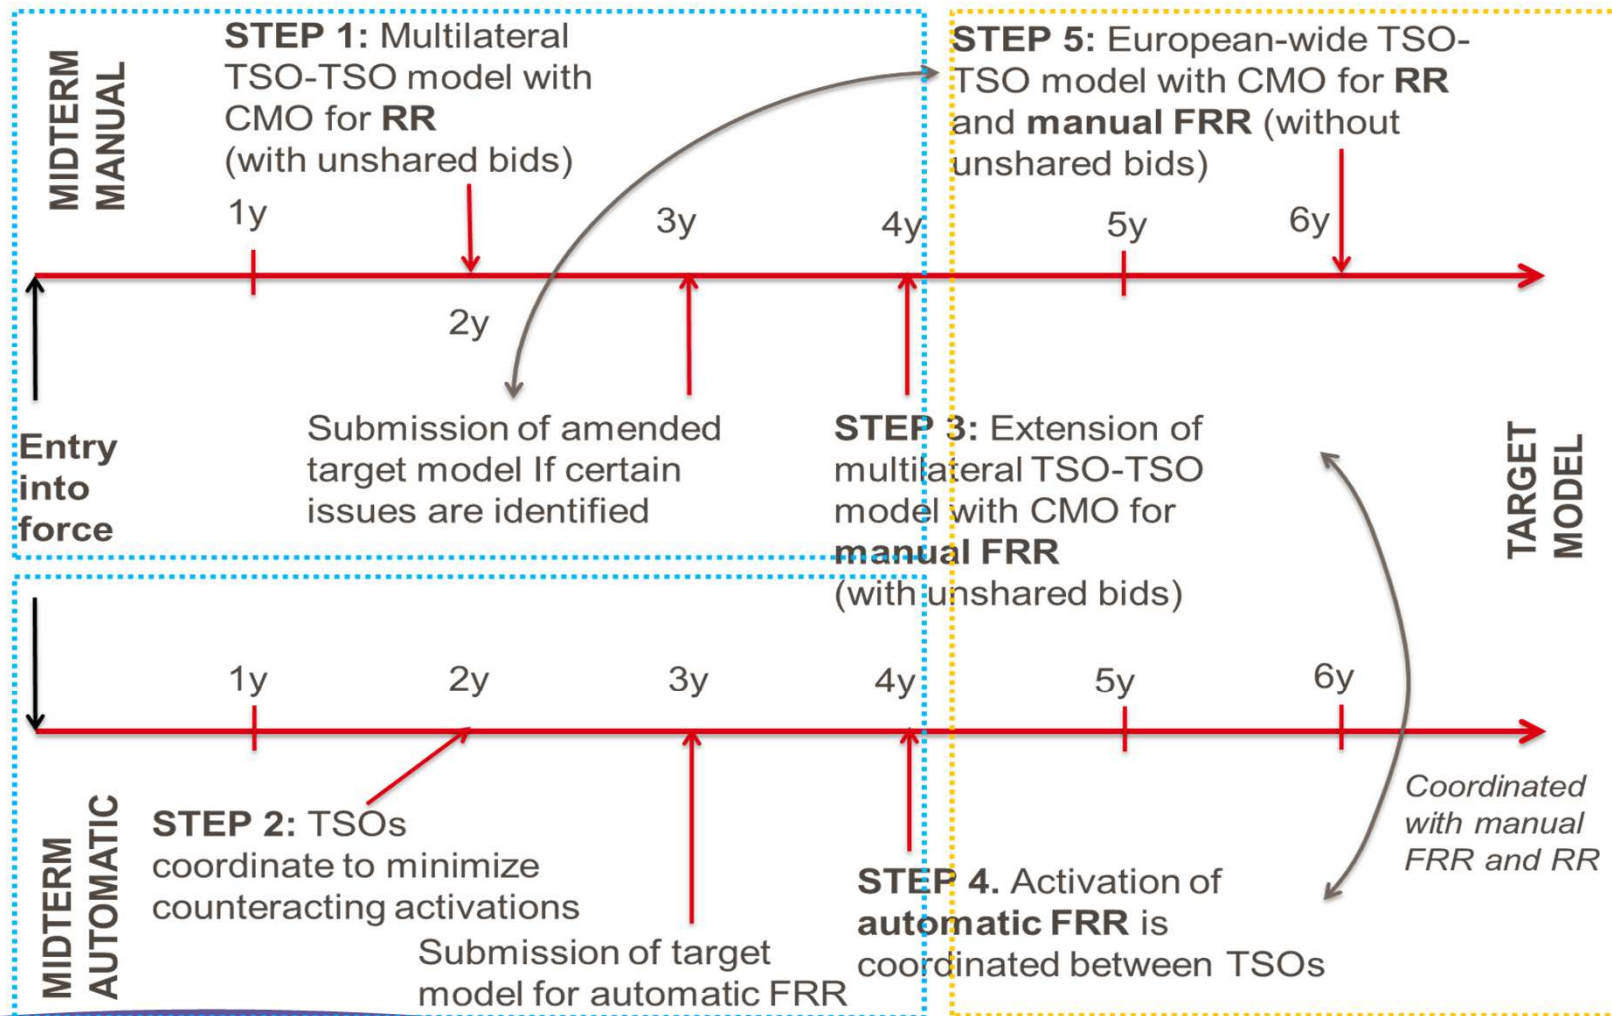

- 10th October – 1st EBSAG Meeting
- 10th December – 2nd EBSAG Meeting
- 7th Feb – SEDC
- 14th Feb – ACER/CEER Network & Markets TF
- 26th February – 3rd EBSAG Meeting
- 12th Mar - SEDC/DSOs
- 22nd Mar – Workshop with ACER
- Early April – 1st Public Workshop (date TBC)

Tentative timeline

to be confirmed

FWGL Integration Targets for Balancing Cooperation's

Conclusion

- **Very challenging targets**
- **Very little (almost no) experience available yet**
- **DT of ENTSO-E is working under high pressure in order to develop the NC on Balancing!**
- **Nevertheless, Stakeholder involvement is deemed as an important issue!**
