

Overview of early implementation of CAM NC (IP-level)

Briefing for 2nd CAM Roadmap group meetings

Victoria Gerus
ENTSOG Adviser

Ljubljana – 18 September 2013

Scope of CAM NC*

Article 2 Scope

1. This Regulation shall apply to interconnection points. It may also apply to entry points from and exit points to third countries, subject to the decision of the relevant national regulatory authority. This Regulation shall not apply to exit points to end consumers and distribution networks, entry points from ‘liquefied natural gas’ (LNG) terminals and production facilities, and entry-exit points to or from storage facilities.

Where

‘interconnection point’ means a physical or virtual point connecting adjacent entry-exit systems or connecting an entry-exit system with an interconnector, in so far as these points are subject to booking procedures by network users

* Regulation text as of 15 April 2013

ENTSOG/ACER CAM NC IP list

CAP368
29 July 2013

List of Interconnection Points for the Expected or Possible Application of the Capacity Allocation Mechanism Network Code

EXPLANATORY NOTE/DISCLAIMER

The capacity allocation mechanisms network code (CAM NC) is expected to become a Commission Regulation in Q3 2013, subject to the scrutiny of the European Parliament and Council of Ministers and the adoption of the European Commission.

The CAM NC applies to interconnection points (IPs), meaning physical or virtual points connecting adjacent entry-exit systems or connecting an entry-exit system with an interconnector, in so far as these points are subject to booking procedures by network users. It may also apply to entry points from and exit points to third countries, subject to the decision of the relevant national regulatory authority. It will not apply to exit points to end consumers and distribution networks, entry points from LNG terminals and production facilities, or entry-exit points to or from storage facilities.

This two-part list has been prepared by ENTSOG in co-operation with ACER and NRAs. It represents a best assessment, as of 29 July 2013.

- Part I: IPs where the CAM NC is expected to apply (either on both sides or one side of an IP);
- Part II: IPs where the CAM NC may apply in the future, subject to a NRA decision.

The list may be subject to update.

Connection points where it is expected that the CAM NC will not apply, as they are covered by the exclusions in the CAM NC, are not included in this list. Therefore, this file should not be considered an exhaustive list of connection points.

The names of IPs may differ on each side of the border (e.g., Winterswijk on the Dutch side is called Vreden on the German side). For these, we have adopted the name that is most commonly used in a European context. For others, the names given are given.

The information provided was originally prepared in a professional and working language by ENTSOG and relates only to the application of the CAM NC without any prejudice to the application of the CAM NC. It is not intended to be used for any other purpose (e.g., transparency requirements concerning transmission system operators). All information is provided as to the completeness, accuracy, fitness for any particular purpose or any use of results based on such information.

Corrections can be communicated to ENTSOG in real-time

To be updated approx. every 6 mos. -- in sync with CAM Roadmap updates

Part I: IPs where the CAM NC is expected to apply (on both sides or one side of an IP)

PART I: INTERCONNECTION POINTS WHERE CAM NC EXPECTED TO APPLY

See explanatory note for detail.
Version date: 29 July 2013

Note
> Uni-directional IP (flow direction)
<> Bi-directional IP

APPLICATION ON BOTH SIDES OF IP

		GRTgaz	FR	>	Fluxys Belgium	BE	IP will be operational in the end of 2015. CAM NC will apply to the available capacity.

For example:

- IPs where there are derogations in one of the Member States Corrections can be communicated to ENTSOG in real-time
- IPs with production sites where the NRA has decided to apply the CAM NC on the Member State side

Operating VIPs are included

Part II: IPs where the CAM NC may apply in the future, subject to a NRA decision

PART II: INTERCONNECTION POINTS WHERE FUTURE APPLICATION POSSIBLE (SUBJECT TO NRA DECISION)

See explanatory note for detail.

IP-level early implementation info: firm standard capacity products (offered; bundled)

By when will firm capacity products (where available) be allocated via auctions?									
Yearly		Quarterly		Monthly		Day-Ahead		Within-day	
Offered	Bundled	Offered	Bundled	Offered	Bundled	Offered	Bundled	Offered	Bundled

Key:

- Yes** already implemented (as of 1 Sep. 2013)
- 2013** end-2013
- 2014** end-2014
- 2015** prior to 1 November 2015
- TBD** to be determined (i.e. implementation decision pending)
- ID** Implementation on deadline of 1 November 2015
- NA** not applicable

At a given IP for the same direction of flow, if the products do not match for TSO 1 and TSO 2, two entries per cell can be made (date TSO 1 / date TSO 2)

IP-level early implementation info: firm standard capacity products (offered; bundled)

When product(s) auctioned, by when...			
Web-based platform used?	URL/web link for booking platform	CAM NC timings used?	CAM NC auctions algorithms used?

IP-level info: examples* (1)

ILLUSTRATIVE

Annex/table includes 77 IPs where CAM NC application on both sides is expected

Bundled product offers available from German TSOs and some other PRISMA participants already

Offer of within-day products under consideration or not planned until formal implementation date of Nov'15

APPLICATION ON BOTH SIDES OF IP						By when will firm capacity products (where available) be allocated via auctions?

* ENTSOG info. file under review by NRAs through 20 September 2013

ENTSOG observations from early implementation reporting exercise

- > **Within pilot projects identified and reported upon**
 - **range of the standard capacity products offered will increase over time**
 - **bundling is nascent but will increase over time**

- > **Other TSOs are working toward the CAM NC implementation deadline of 1 November 2015; additional pilot projects may emerge over time**

- > **ACER/ENTSOG aspire to increase number of IPs reported in the March 2014 update of the CAM Roadmap**

It is hoped that CAM NC IP list and early implementation report will serve as a valuable resource for stakeholders
