1. WE ARE

The Agency for the Cooperation of Energy Regulators (hereinafter referred to as “the Agency”) is a European Union (“EU”) body, legally established by Regulation (EC) No 713/2009¹ and operational since 2011. The Agency is central to the liberalisation of the EU's electricity and natural gas markets.

The purpose of the Agency is to assist National Regulatory Authorities (“NRAs”) in exercising, at Union level, the regulatory tasks that they perform in the Member States and, where necessary, to coordinate their action.

In this respect, the Agency:

- a) Complements and coordinates the work of NRAs;
- b) Participates in the development of European network rules;
- c) Takes, under certain conditions, binding individual decisions on terms and conditions for access and operational security for cross-border infrastructure, on cross-border cost allocation for Projects of Common Interest and on terms and conditions or methodologies for the implementation of network codes;
- d) Gives advice on electricity and natural gas related issues to the European institutions;
- e) Monitors the internal markets in electricity and natural gas and reports on its findings;
- f) Monitors trading in wholesale energy products to detect and deter market abuse and ensure the integrity and transparency of EU wholesale energy markets.

¹ Regulation (EC) No 713/2009 of the European Parliament and of the Council of 13 July 2009 (OJ L 211, 14.8.2009, p. 1).

The main areas on which the Agency's activities focus are:

- Supporting European market integration: this is mainly done through the development of common network and market rules, as well as through the coordination of regional initiatives which are concrete efforts from market participants to work towards greater integration;
- Advising the EU Institutions on trans-European energy infrastructure issues: the Agency issues opinions on ten-year network development plans, to ensure that these are in line with priorities set at EU level, and on the draft lists of Projects of Common Interest;
- Energy market monitoring: the Agency has a general mission in terms of market monitoring at the EU level and has, since the end of 2011, a very specific responsibility when it comes to the oversight of wholesale energy trading.

With the “Clean Energy for all Europeans” package legislation, additional tasks are assigned to the Agency, including, in particular:

- approving the all TSOs' proposals for terms and conditions or methodologies to be developed under the Commission Guidelines,
- approving or amending the new resource adequacy and risk preparedness methodologies to be developed by ENTSO-E,
- monitoring state interventions preventing prices from reflecting actual scarcity and the performance of Member States in electricity security of supply issues.

The Agency currently employs more than 80 staff members and has an approved annual budget of €16.1 million in 2019. The Agency's internal structure comprises five Departments (Electricity, Gas, Market Surveillance and Conduct, Market Integrity and Transparency and Administration) and the Director's Office.
